Air Headers and Distribution Manifolds

We offer Air Headers that replace many unit valve assemblies that normally operate from one source.

The Air Headers are suitable for use with a variety of outlet take-off valves.

The inlet-connection can be screw-able.

The drain-valve of the system is at the manifold exit and the manifolds can be supplied with a bracket or U clamp for ease of wall mounting.

Specification for air headers :

M.O.C:SS316 / SS304 / CS

Size:

1 1/2" / 2" - SCH40 / SCH80

Inlet:

ANSI B 16.5 , 150# RF 1" NB Flange /1" NPT (F) 3 Peice Union

Distribution Ports:

Size -1/4" / 1/2" , Ports - 6 / 8 / 10 / 12 / 16

Outlet:

1/2" NPT (F) , SS316 / SS304 Ball Valve With 1/2" NPT(M) Plug

Other:

We can also manufacture according to customer's sample (other specification).

Leveringspakket :

- Afsluiters
- Dynamische afdichtingen
- Statische afdichtingen
- Mechanical seals
- RVS filterelementen
- Rubber Vormwerk
- Constructie, plaat- en leidingwerk
- Machinale verspaning
- Service
